LOANS TO YALE STUDENTS. Prof. Effect Describes a New Way of

Helping the Deserving. New HAVEN, March 22.—In a statement issued to-day by Prof. C. L. Kitchel, head of the Bureau of Self Help of Yale University, a new scheme for lending money to needy Yale students without security is described. It is another application of the honor system. Prof. Kitchel explains the plan as

from a graduate of a class not yet ten years out of college in which he offered to lend \$100 to a needy and a worthy member of the junior class and the same sum to a senior similarly situated, promising to repeat the loan to the junior in his senior year and then lend another \$100 to another junier, the intention being to always be alding a junior and a senior in this way.

"A beginning has already been made toward this scheme. The notes are to be made payable at a definite time, say five years from date, though the time might vary according to circumstances, order of the lender at his place of t are to bear interest at the rate of 5 per cent. the transaction being intended to be a strict business one except that an indorser

strict business one except that an indorser is not required.

"By the beginning of junior year many students of scanty means have exhausted their resources just when they need all their time free from outside work in order to reap the benefit of the great opportunity which the university affords men who by faithfuiness and success in the work of the two preceding years have proved themselves capable and reliable. A loan offered at such a time may prevent a break down in health from overwork, or obviate the necessity of interrupting the coolege course.

"Some time before long it is hoped that the college may have an adequate loan fund. Lehigh University has recently received a bequest of \$300,000 the income of which is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. Meantine it is to be used in this way. access to a similar way, or from the spirit of helpfulness which is the true Yais spirit may be moved to follow the example accessible.

Through the work of the Bureau of Self Hep I have an intimate knowledge of the needs of all the poor men in college and if any absorbe wante to start a little ions fund of his own in some such way as has been described I shall be vary glad to be the interme liney.
